Introduction

In its 2004 Ontario Budget, the government committed to a fundamental transformation of the way the Ministry of Training, Colleges, and Universities (MTCU) delivers training and employment programs, leading to more effective and efficient services and better results.

As part of this commitment to improve service to clients, the ministry has been working with its Labour Market and Training Division stakeholders to identify supports to build the capacity of the training and employment system to:

- increase clients' access to relevant and consistent information about the labour market and training and employment programs; and
- support effective client referrals across Ontario's training and employment system.

Work with stakeholders has resulted in the development of the Information and Referral Resource Guide. The information in this guide supports the ministry's vision of an integrated training and employment system with improved access for clients. The guide is for ministry staff and LMTD-funded service providers responsible for delivering information and referral services.

Programs and services delivered by the Labour Market and Training Division (LMTD) currently provide high-quality information and referral to diverse clients in many communities across the province. This guide builds on current practices to create a common framework for LMTD programs and services in the areas of information provision and client referral. It also includes resources for ministry staff and LMTD-funded service providers that will enable them to provide consistent information about training and employment programs and services to clients across the province.

The guide contains:

- the principles and expectations to help build an effective referral network across training and employment programs and services; and
- a package of resources for effective information provision and client referral.

Please review the guide, including the questions and answers section and the resources provided. As you read through the guide, it is likely you will find that much of the common framework is already integrated into your information provision and referral processes and that you are familiar with some of the resources. The guide and resource package will be updated by the ministry so feedback on the guide is welcome.

A Framework for Information Provision and Client Referral

The ministry recognizes that service providers across the training and employment system have different levels of program and service knowledge, experience, expertise, and accountability for providing information and referral to clients. The guide builds on current practices to provide a common framework for LMTD staff and service providers delivering information and referral services. Outlined below are the expectations and the principles to ensure efficient and effective information provision and referrals to clients.

The ministry expects that through information provision and referral clients will:

- efficiently and effectively access relevant labour market and training information with assistance of ministry staff and/or third-party deliverers or through self-directed pathways such a website or hotline;
- understand relevant training and employment services available to them in their community and across the province; and, if appropriate,
- be referred to the most accessible office or site where their needs can be assessed and the most appropriate employment or training service identified.

The ministry expects results of effective information provision and referral will include:

- improved efficiency and effectiveness of client referrals across Ontario's training and employment programs;
- enhanced referrals among LMTD programs and services and to the broader training and employment services; and
- consistent client access to labour market and training information across LMTD programs and services.

LMTD training and employment service providers responsible for delivering information and referral services must demonstrate that:

- an initial screening is in place to clarify client need and direct clients to the most appropriate services where a complete assessment of their needs can be made;
- information is accessible to the client and made available, in print and/or electronically, about all LMTD programs and services (including federal programs that will transfer to Ontario on January 1, 2007);
- clients receive information that is accurate and relevant to their needs;
- clients are referred to the most appropriate service; and
- clients are assisted in understanding program and service offerings and options from across the system.

To ensure quality across the ministry's LMTD programs and services, information and referral services are based on the following principles:

- | | |
|------------|--|
| Accessible | <ul style="list-style-type: none">• Clients have access to information about all provincial training and employment services regardless of their point of entry into the training and employment system.• Francophones and non-English speakers have access to basic program and service information.• At minimum clients will receive some relevant information and guidance. |
|------------|--|

- | | |
|----------------|---|
| Accountable | <ul style="list-style-type: none">• Efficiency and effectiveness are achieved through consistent and streamlined information provision and referral to all appropriate training and employment services.• Service providers use a consistent approach to information and referral. |
| Client-centred | <ul style="list-style-type: none">• Information provision and referral services are timely and responsive to clients needs.• Welcoming and non-threatening environments .• Personal information is kept confidential. |
| Flexible | <ul style="list-style-type: none">• Within provincial priorities and program guidelines, information and referral services accommodate the varying needs of clients and their communities. |
| Results-based | <ul style="list-style-type: none">• Information and referral services are evaluated against demonstrable performance indicators. |

Questions and Answers

How much of this is new?

- LMTD client-facing staff and LMTD-funded service providers have been expected to have information and referral processes and procedures in place as part of their service, ensuring linkages to other LMTD programs and the broader employment and training system, so much of this will not be new. The guide integrates and builds on elements deliverers have been working with for some time as required by ministry guidelines, under a common framework for all LMTD programs and services.

Why is MTCU introducing this now?

- The guide builds on work and recommendations from the “no wrong door” pilots with stakeholders in winter 2006. It lays the groundwork for improving client referrals among LMTD programs, and across the broader training and employment system, and will support consistent access to training and employment system information across third-party deliverers. It also provides information about programs and services that will transfer to Ontario from the federal government as of January 1, 2007.

What benefits are there for me?

- You will be provided with up-to-date and consistent information on training and employment programs and services to be provided by the province. You will also have access to electronic information and tools to assist clients in locating service providers in your community.

Who will receive this information?

- The guide and resources are being provided to all LMTD staff and service providers.

What do I need to do now?

- You should review this guide and resources to familiarize yourself with the large array of training and employment programs and services available to clients. We would also ask that you visit the MTCU website (<http://www.edu.gov.on.ca/>) and familiarize yourself with the content and search features.
- You should ensure that your current information and referral protocols support the common framework and integrate the new resources into your information and referral processes.
- You should ensure that staff providing information and referral services are up to date on this new information and use it to support information provision and referrals.

What am I responsible for?

- Over the 2007/08 fiscal year, the ministry will collect baseline data so that standards for information and referral services can be developed. The ministry will seek feedback from ministry staff and third-party stakeholders on potential indicators and measures for information and referral.

Who will monitor implementation of the guide?

- LMTD managers will be responsible for ensuring protocols and information are integrated into ministry operations.
- Ministry consultants through Job Connect and Literacy and Basic Skills will continue to monitor service providers contracted information and referral services. New ministry expectations and reporting will be integrated into annual business plans.

What supports are available to me?

- See the “Information and Referral Resources” section of this guide to find out more about the resourced available to you.

How intensively will I be expected to assess a client through the initial assessment?

- It is likely that you already have information and referral protocols in place as part of your service to clients. The expectation is that you have an initial screening in place that allows you to clarify client need and direct a client to the most appropriate services where a complete assessment of their needs will be made.

Will I be expected to make appointments for clients?

- The expectation is that you will provide clients with information about the types of programs and services available in their community, and direct them to the most appropriate entry point into the training and employment system.
- Assisting clients further to make contact with an agency will depend on your agency’s referral policy and clientele and is not a ministry expectation.

How will the ministry support linkages to the broader training and employment system?

- The ministry is providing the information resource package to partners that include Ministry of Community and Social Services (MCSS), Ministry of

Citizenship and Immigration (MCI), Service Canada, and Service Ontario. The ministry will continue to work with these partners to maintain and build relationships that support information and referral across the training and employment system.

Information and Referral Resources

The materials contained in this section are the resources to support consistent information provision and referrals of clients and employers in the new, integrated training and employment system in Ontario. The materials are divided into three sections:

- Client Section
- Employer Section
- Additional Training and Employment Programs

Each section contains the following components:

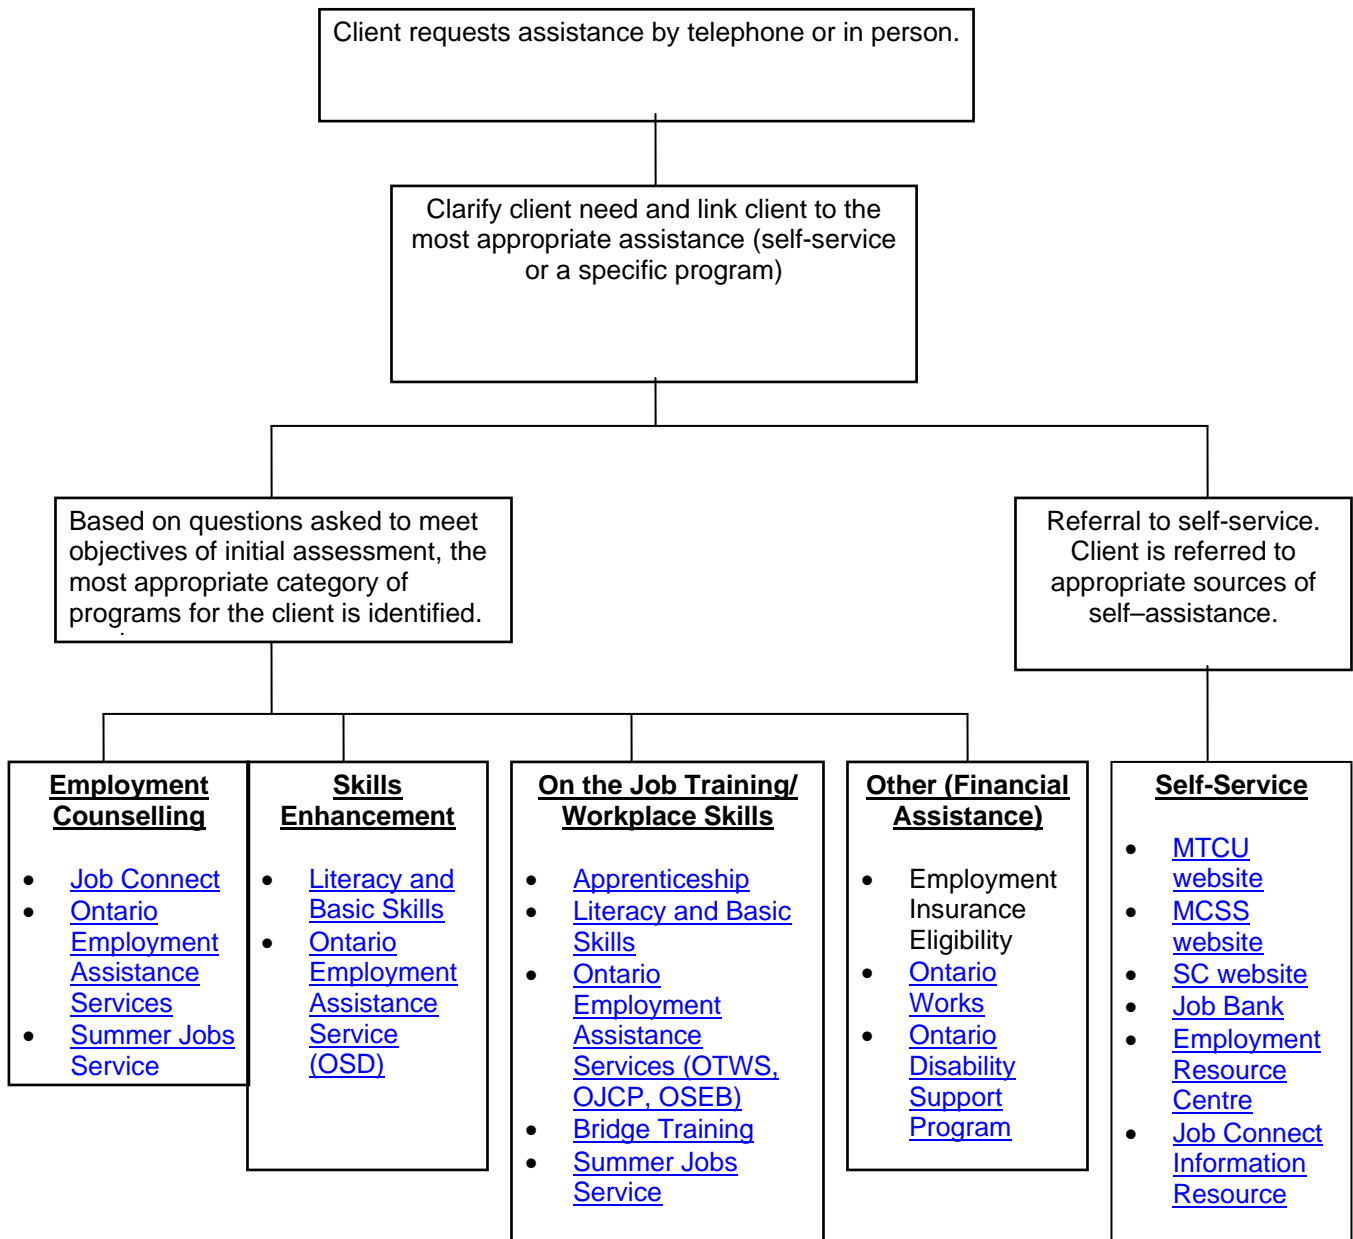

- **Client and Employer Flow Chart:** This document outlines the path potential clients or employers would follow as they make their way into the training and employment system. This diagram is intended to give you a sense of the initial steps a client or employer would take prior to entering a specific program or service, including the initial screen to determine what his or her needs are, and then the programs and services available to meet those needs.
- **Objectives of Initial Assessment:** During the initial assessment, a client's or employer's needs are determined according to the larger set of training and employment programs and services available to a client or employer in the new integrated training and employment system.
- **Training and Employment Programs and Services Listed by Category:** Depending on the responses received during the initial assessment, you will be able to determine the type of program or service a client/employer is seeking. The client/employer chart lists specific programs and services available under each program/service category.
- **Training and Employment Program and Service Descriptions:** Once you have determined the category of programs and services that would best meet the needs of the client/employer, these program descriptions provide more detailed information about the programs and services, including who is eligible and how to locate the service in a specific community.
- **Additional supports:** Additional resources to help you or to self-direct your clients include:
 - **Employment Ontario website.** The website (<http://www.ontario.ca/employmentontario>) has been updated with the same LMTD program/service descriptions as contained in this guide. The information on the website has been grouped according to audience (job seeker, employer, employee, apprentice, student) and will include links to other ministries and Service Canada, and increased capacity to locate service providers at the community level through a "smart directory" of service providers.

NOTE: Programs/services in parenthesis (Ontario Skills Development, Ontario Targeted Wage Subsidy, Ontario Self-Employment Benefit, Ontario Job Creation Partnership) are available only once a formal assessment has been completed. The assessment centre (OEAS Office) completes an assessment and develops a return to work action plan (RTWAP) with the client to determine most suitable program or service for the client to get back to work. The referral to the specific program/service is made by the Assessment Centre. Provincial programs/services such as Job Connect and Literacy and Basic Skills do assessments at their locations to determine eligibility.
